

DREAM YOGA... BEYOND LUCIDITY

Tibetan Buddhist Discipline for Living and Dying Awake

with Charlie Morley and Deborah Jones

July 27— August 1, 2017
Joshua Tree, CA

Lucid dreaming is far more than an extreme sport. It's more than learning to wake up in your dreams so you can fly or experience super powers. Beyond the egoic approach to lucid dreaming dwells an esoteric practice capable of challenging your view of a fixed reality held in place by your beliefs and biases.

Developing lucidity in dreams is an ancient mystical discipline. It's a shamanic undertaking, an alchemy of awareness inviting the practitioner into a state of wakefulness that crosses realities and levels of consciousness. Lucid dreaming is the gateway. Beyond lucidity, structures give way to an expressing unified field of potential. Learn to stay awake. Learn to offer your life and death as a gift to the greater awakening at play. Be that kind! **Become the Conscious Dreamer!**
